

Yamaha WaveRunner Service Contract

Park Marine Boating Centers is proud to offer Service Contracts on both **NEW** and **Used** Yamaha WaveRunners. A service contract will allow you to lock in necessary routine maintenance for your Yamaha WaveRunner for 1-3 years at discounted rates. In addition, a Service Contract will provide you with other key benefits (see below).

Key Advantages:

- **Discounted Rates up to 25%** – when you lock in a service contract with Park Marine Boating Centers, you’ll save up to 25% off of preventative and routine maintenance services vs. an a la carte approach
- **Protect your investment** – proper service and care will extend the life of your WaveRunner and help maintain its value should you decide to trade-in or sell in the future
- **Minimize downtime** – Preventative care will help your WaveRunner work like it’s supposed to – that means more time out on the water and less time in the service shop
- **Reduce Hassle** – let us take a load off so you can be stress free and focus on what matters most – having fun with family and friends
- **Priority Scheduling** – priority scheduling means less time in the shop, more convenient drop-off and pick-up windows, and routine and preventive care in the off-season so you can enjoy your baby all summer long
- **Financing Available (with waverunner purchase)** – take advantage of historically low interest rates whether you’re buying new or used - with one low monthly payment and a service contract, all you have to do is gas up and go!
